

The DAILY HERALD has nearly **DOUBLE** the Circulation of either contemporary paper published in Los Angeles. As an advertising medium it is consequently **DOUBLE** their value.

Our Mineral Resources.

The mountains surrounding Los Angeles are undoubtedly the storehouse of more mineral wealth than has ever been developed in a like area of the earth's surface. The oil of the San Fernando will unquestionably before long take rank as one of the richest products of the Pacific Coast. It only waits the developing hand of capital to spring into a magnitude, not excelled even by the oil regions of Pennsylvania, China and Japan are just beginning to call on us for oil. This demand will insure a market for all that we can produce.

The Cerro Gordo mining region is already developed to an extent that makes it necessary that additional means of communication shall be immediately provided. The Panamint discoveries, wonderful as they already prove to be, are only the opening of the threshold. The best mineral deposits that are known to exist will soon pour forth a tide of wealth that will eclipse any mining region in the State.

The Holcombe Valley mines are developing day by day a wonderful richness, and if the half that is told be true, the wonders of the Comstock lode will be repeated.

Another grand discovery, this time of cinnabar, on the line between San Diego and San Bernardino counties, has been reported, and its richness seems to be authentically established.

There is wealth enough lying buried in these various localities, and only waiting the hand of capital and labor, to support a city greater than this continent has ever seen. It may take years to develop them and bring their wonderful riches to light, but in the meantime we should be preparing to reap the benefit of these vast deposits. Some great city must be the entrepot of the streams of wealth that will soon begin to flow into the commercial world, and if the business men of Los Angeles are wise, they will prepare the way for this city to occupy that position. No mere natural advantages of position will ever give any locality the control of the trade that the future is bound to develop. We must provide means of communication with all these rich districts. We must also have adequate communication with the sea, and this communication must not be under the control of an organization the interests of which are in a contrary direction to our own.

We are already doing something in the oil regions. Our attention has been recently directed toward the mining regions, and a good feeling has been established. Let us keep up the march of improvement, and our future prosperity is assured.

Ramie and Jute.

The Commissioner of Agriculture has issued a pamphlet, prepared by Emile Lefranc of New Orleans, giving valuable information about the culture of these plants. As the question of providing sacks for our immense wheat crop, and bagging for baling our wool, is an important one, we give such portions of the pamphlet as seem to be of the greatest interest. In regard to the cultivation of jute, which just now occupies the attention of California farmers, it says:

"To obtain good fiber crops the land must be elevated, rich, moist and well drained, as in India. The soil should be of a heavy, loamy, or silty nature, and the water should be abundant, provided that favorable weather allows sowing and enables the growing plants to keep above the points of overflow. However, when the growth is fully started, water is not to be feared so long as the tips remain above the surface of submergence.

"In the first place jute is sown broadcast, in the second, it drills five feet apart. That interval is to facilitate the branching, and at the same time the destruction, by plowing, of the tall weeds which generally occupy low lands. In both methods the soil must be prepared as for ramie, plowed as deep as possible in January and February, then left exposed to the atmospheric influences until the planting period. That period commences with April and terminates with June, in monthly succession. To prepare for sowing a second plowing is required, and as flue a harrowing as can be effected. The circular pulverizer, applied before the harrow, shortens the labor. Then the sowing for fiber crop is performed broadcast with a Calhoun sower. With that instrument, costing eight or ten dollars, a man can sow ten acres of jute per day. The quantity of seed required for each acre is from twelve to fifteen pounds. That is amply sufficient, and if the Hindoos put more in their land, there must be some accountable reason for that excess. Either the condition of their seed or of their land is inferior to that of America, or they are singularly prone to go to waste. We have repeatedly observed that when the growth is thicker than what is allowed by the aforesaid quantity of seed, some natural destructive agent enters into the stand and thins the space to the limit demanded by the plant. This fact was verified in several spots of jute-plantation in Louisiana. Therefore no advantage at all can be derived from prodigality in sowing. The equal distribution obtained by the mechanical sower may account also for the economical difference existing between us and the Hindoo planters, who, having no machinery whatever, do all their work by hand.

"The ground should be well filled and the seed properly sown, on wet days if possible, the jute is left alone like wheat. No other care than that of drainage is necessary until maturity. The cost of that first operation cannot exceed \$4 per acre, if the material is adequate and the management judicious. That expense, of course, does not include the value of the seed, because after the first outlay planters will provide themselves with it from the low lands, or from the weak spots on the plantation. In the bottom, when we plant in drills forced, a subsequent plowing or two will be necessary in the intervals to neutralize the encroachments of grass. In Louisiana that labor is a necessity principally for the purpose of combatting the tall weed called 'wild indigo,' which occupies the low grounds. This tall weed, which is so fibrous, is the only weed that keeps pace in growth with jute; all other plants are stifled and smothered by the shade of the corchorus."

"In the field planted broadcast no parasite can resist the vigorous and absorbing influence of jute. Even the hardy and noxious graminoid plant, commonly called 'weed' in Louisiana, is destroyed after two seasons of broadcast cultivation. Another peculiar advantage of jute planting is the antagonistic influence it exerts over insects, especially the lepidoptera tribe, which generates the caterpillar. It has been stated in some reports of the Department of Agriculture that cotton fields surrounded by jute plantations were respected by the devouring worms, the director of the Ramie Planting Association made special experiments to test the reported fact. Three different fields planted with various sorts of cotton, were belted by jute. None of them were visited by the caterpillar, while the cotton of adjacent plantations was partly destroyed by the insect. That protection is attributed to the above mentioned influence hostile to insects."

The New Gas Works.

There will be a meeting at Temple's Bank this evening to form the company for the erection of the proposed new Gas Works. We think this movement is important, not only in view of the important reduction in the cost of gas that is likely to follow, but for the reason that the operations of the new company are likely to have a favorable effect upon the development of our oil interests. It is the intention of the projectors of this enterprise to employ the petroleum of the San Fernando wells in the manufacture of gas, and this can hardly fail to result in attracting much attention to these deposits. Attention is all they need, and once let the eyes of the world be opened to their immense wealth, and they will soon become the center of attraction.

THE Postal Savings Bank scheme seems to meet with no favor in Congress. The Committee will report unfavorably, and with the growing disposition to check the innovations of budding statesmen of the paternal school it is not likely that any such project will go through.

Another Batch of New Laws.

The following bills, having been signed by the Governor, have become laws:

39. An Act repealing Sections 3399, 3400, 3401, 3402, 3403 and 3404 of the Political Code, and requiring the State Land Agent at Washington to return to the Surveyor-General all maps, documents and papers now in his possession, or under his control, touching the lands of the State.

40. An Act providing for the appointment of Notaries Public: In Santa Clara county, eight of whom one is to reside at Mayfield, one at San Felipe, one at Milpitas, one at Saratoga, one at Gilroy, and one at Mountain View; in Santa Barbara and San Luis Obispo counties, three each; in Sonoma county, two, of whom one is to reside at Pine Flat.

41. An Act fixing the terms of the County Court in Tulare for the first Monday of March, June, September and December.

42. An Act amendatory of an Act making an appropriation for the suppression of the Vaquez bandits. Provides that the Governor may expend \$5,000 in paying the expenses of pursuit, and \$10,000 in paying rewards.

43. An Act to authorize the Supervisors of San Francisco to transfer from the General Fund of the City Treasury certain amounts to special funds and to pay out of the same fund accrued interest on the public debt.

44. An Act to authorize the Supervisor of San Francisco to transfer from the General Fund of the City Treasury certain amounts to special funds and to pay out of the same fund accrued interest on the public debt.

45. An Act to repeal the special road laws of Santa Barbara and San Luis Obispo counties.

Purification of Water.
Mr. Cooke, an English chemist, recently prepared a "memorandum" on the purification of water for the benefit of the army at Ashmont. His remarks are of a general character, and merit attention in all places where the water is more or less impure. He says:

Under the name of a B.C. compound, a mixture of sulphate of alumina, clay and charcoal has been successfully used by the Native Guano Company for the purification of sewage. At their works I have repeatedly seen the sewage at such places as London, Paris, Hastings and Leeds converted, in the course of an hour from an offensive-looking, vile-smelling liquid into water, bright, clear, inodorous and tasteless, non-purifiable and so free from injurious matter as to allow delicate fish to live and thrive in it.

With a little necessary modification I consider that a mixture capable of acting thus on town sewage is the most suitable for the purification of water for drinking purposes on the Gold Coast. I would suggest that the charcoal be omitted, and its place supplied by a permanganate. The ordinary potash salt will do, but, if procurable in time, I have reason for believing that permanganate of lime would answer the purpose better. I have prepared a mixture of one part of permanganate of lime, ten parts sulphate of alumina, thirty parts fine clay, and find that when I add this to London sewage in the proportion of twenty to 10,000, the purification is very satisfactory, and the settlement rapid. With foul ditch-water a less quantity will do.

The mixture can be filtered, instantly yielding a bright filtrate, or it can be allowed to settle for a quarter of an hour, when the supernatant water can be poured off equally bright. I am not prepared to say what the

price of this mixture would be, but it would probably not be many pence per hundred gallons of water.

Facts About Arizona.

The Territory of Arizona was organized February 24, 1863.

It contains about 70,000,000 acres. It is what may be termed a mountainous region, although there are immense valleys on many streams; also between its hills and mountains.

The principal ranges of mountains are the San Francisco, Bill Williams, Mogollon, Sierra Blanca, Sierra Prieta, Pinal, Apache, Cordillera de Gila, Natanes, Chiricahua, Dragones, Santa Rita, Graham, Aztec, Wallapai, Antelope, Cerbat and Haequehilla.

The principal peaks are, the San Francisco, about 14,000 feet above the level of the sea; the Sierra Blanca, about 12,000 feet; Bill Williams, about 11,000 feet; and Mount Union, about 10,000 feet. The highest mountains are in Northern Arizona.

The mountain ranges and their foothills are covered with pine, oak, cedar, juniper, poplar and other timber; and we feel safe in asserting that one-third of the Territory is timber land. As most of this timber is large and of fair quality, it will, in time, prove a vast source of wealth.

The principal rivers are the Colorado, which is navigable for hundreds of miles; the Gila, Salt, Verde, Bonita, Prieta, San Pedro, Beaver, Santa Cruz, White, Sique, Bill Williams, and little Colorado. Creeks and springs are numerous, and water is found everywhere by digging.

The principal towns are, Yuma, Ehrenberg and Hardyville, on the Colorado; Wickenburg, Hassayampa creek; Prescott, on Granite creek; Phoenix, on Salt River; Florence, Pima Villages; Maricopa Wells, and Adamsville, on the Gila; Tucson, on the Santa Cruz; Cerbat, Mineral Park and Chloride, in Wallapai mining district.

The military posts are, Whipple, near Prescott; Verde, on Upper Verde River; McDowell, near junction of Verde with Salt River, a short distance above Phoenix; Camp Apache, on White River, in White mountains; Bowie (Apache Pass) in Chiricahua range; Lowell, near Tucson; Grant, on San Carlos; Mohave, on the Colorado; Beale Springs, in the Wallapai country. These posts receive supplies from Yuma Depot.

Counties—Yavapai, which has a greater number of white inhabitants, a larger area, more mountain ranges, streams, timber and mineral deposits than any other county in the Territory.

Pima—which has the largest town in the Territory, Tucson, and the largest number of Mexicans and semi-civilized Indians.

Maricopa county lies between Pima and Yavapai, and is noted for its agricultural productions, which far exceed those of any other county in the Territory.

Yuma county contains much choice farming and grazing lands. Her chief towns—Yuma and Ehrenberg—have extensive trade with the people of the interior.

Mohave county is now gaining rapidly on her sisters, in wealth and population. She has mines, grazing and farming lands that are among the best on the continent.

The Territory, formerly known as Pahr-Ute county, has been handed over to the State of Nevada.

As a correct census of "whites" and Indians has never been taken, we will take the responsibility of placing the number of whites at about 10,000, and the number of Indians at about 20,000, which gives the Territory a population of about 30,000. This estimate includes Mexicans and tame Indians.—[Arizona Miner.]

Bunker Hill.

A little over a year more, and the 100th anniversary of the Battle of Bunker Hill will take place. A little band of heroes, then inaugurated a struggle, which brought untold results. It is very fitting that their deeds should be commemorated. The nation at large is very justly arranging for a celebration on an extensive scale, of the centennial anniversary of this event. This will instil patriotic impulse into the souls of those of the coming generations, and prepares them for the struggles, which they, in life, must undergo. Overhanging Los Angeles is a hill similar to Bunker Hill—nay, it is larger. From it all the city can be seen and the country for miles around. On this hill also, are military marks, the remnants of a fort, which was built for the protection of liberty in this State. This hill has an avenue running along its crest, and our friend Beaudry, through whose influence chiefly it has been opened, has very appropriately named it Bunker Hill avenue. The City Surveyor has been ordered to define the grades and lines of Olive, Charity, and Bunker Hill avenue, from Hill to Hope; Second street, and Temple street, from Hill to Hope. This will bring these lands within easy reach of the business part of the city. The distance to the Court House is less than it is from the Turners Hall.

Mr. Beaudry being the owner, by perfect and indisputable title, offers the following scheme, believing that it supplies a felt want.

His various tracts have been surveyed, and platted in lots of convenient size for residences of couples of two hundred in number, and the maps, together with abstracts of title, are kept for public inspection at his office, opposite the Pico House.

Any person desiring to purchase can inspect the land, select his lot or lots, and acquire the same, if not previously taken up by another, upon the following terms: Purchaser not being restricted to a single lot.

The purchaser or his successor to pay the fixed price of the lands selected by him, in equal monthly installments, as follows: On lots valued at \$400 and upwards, but not to exceed \$500, \$15 per month; on those valued at \$300 and upwards, and less than \$400, \$10 per month. Payments in gold or currency, and in hand a reduction of fifteen per cent. will be made.

The purchaser to have immediate possession upon payment of the first installment and on execution and delivery of contract.

The right of the purchaser may be assigned to him, and his assigns to succeed to all his privileges and liabilities; standing in all respects towards the vendor as an original obligor.

Purchasers shall not be restricted to the payment of the installments as above shown, but may make payments in advance, and on all such payments he will allow one per cent. per month, from the date of payment until said payment would become due.

Upon selection of a lot or lots by a purchaser, and payment of the first installment with five dollars, in U. S. gold coin, as expenses on the document, Mr. Beaudry with the purchaser, will execute and acknowledge a sealed agreement, embodying the above conditions; and, upon full payment, according thereto, the undersigned will execute and deliver to the purchaser, or his lawful representatives, on demand, a good and sufficient and absolute deed of conveyance of the land selected.

These proposals will be kept open until the 12th day of February, 1874.

The location is very desirable. All that has been lacking in location is water, and that want is now fulfilled. Anywhere else, in as desirable location, lots readily command from \$500 to \$1,000 and even higher rates. This property is put at the astonishing low price of from \$300 to \$400. But this is not all. This may be paid in currency, and a reduction of fifteen per cent will be made for cash in hand.

Mr. Cassion, who sails for San Francisco to-morrow, on the Orizaba, will bring with him on his return a fine stock of groceries and family supplies, which he will open out in the same store that he now occupies. John is an attentive business man, and deserves encouragement in his new enterprise.

On Monday Dr. Geleick dispatched two eight-mule teams, loaded with lumber, tools and provisions, to the San Fernando oil regions. He also sent up a number of men to assist in developing his oil wells. The doctor is alive to the importance of the oil discovery, and his untiring energy is sure to meet with a rich reward.

This is most positively the last night of the Little Mac and Wallace Combination, and our citizens who desire to enjoy their fun-provoking entertainment must be on hand. The Little Mac will receive a benefit, and will appear as the "Monkey" and the "Baby Elephant," and remainder of the programme will be an attractive and varied one.

Mr. John Cassion leaves on the Orizaba to-morrow with a span of fine horses, which he will dispose of in the San Francisco market. They are a well-matched pair of light bays, about seventeen hands high, and well proportioned, and are adapted to any kind of work. They ought to bring a good round price, and no doubt will when they are trotted out before good judges of horse-flesh.

Capt. Smith of the Petrolpolis Oil Refinery is in town. He reports everything progressing favorably, and the prospect is good. The refinery will be ready in about three weeks. He sends out a lot of material to-day.

An important meeting in which all our citizens are interested will take place at Temple & Workman's Bank this evening. The citizens of Los Angeles are invited to meet and participate in the organization of the new Gas Company, which now promises to be a complete success. The more of our business men that can be interested in this enterprise the better, and we hope to see every body there.

Various projects for the formation of new States out of the territory now comprised in the limits of California, are being advocated. It is not likely that the citizens of this State will be willing to shoulder the expense of additional State Governments, but in the near future, when we have half a million of inhabitants in Southern California, Los Angeles will be ready to take on herself the honors of a State Capital.

Chamber of Commerce.

TUESDAY EVENING, Jan. 27. Chamber met. Secretary read the minutes of previous meeting, which were approved.

A letter was received from Robert N. White Esq., Secretary of the Anaheim Lighter Company, giving a statistical report of the exports and imports of Anaheim Landing.

A communication was received from General Banning at San Francisco, stating that he had interviewed Goodall, Nelson & Perkins, in relation to their Steamship Line to Southern ports. He reports a disposition on the part of the firm to maintain their line. They say they are not to be bought off, and hope to receive a patronage from the public, that will enable them to give us a stable line.

A communication was received from E. E. Hewitt, Esq., Superintendent of the Los Angeles and San Pedro Railroad, in reply to a communication of the Board in reference to the abolition of lighterage, when steamers can come alongside of the wharf.

Mr. Hewitt says that he will submit the matter to the principal officers of the company, and thinks a favorable reply may be expected.

Judge Whitney proposed that the Board should endeavor to make arrangements with the steamship companies for permanent rates for freight and passage to and from San Francisco. He thought it better to pay reasonable rates, even if higher than now rule, and have them permanent.

The matter was referred to the Committee on Railroads and Commerce. On motion of Mr. Lips the Board adopted a by-law, providing that their regular meetings shall be held on the first and third Tuesdays in each month, instead of weekly, as heretofore.

The Treasurer and Secretary were requested to have their reports ready for the next regular meeting of the Chamber, which takes place on Monday evening next. The Secretary was also requested to collect all dues by that time, and to appoint some efficient man to perform that duty.

The Board unanimously returned their thanks to our Senators and Representatives in Congress for their prompt attention to the interests of the people of Southern California.

After a discussion of some minor matters the Board adjourned.

A New Petroleum and Gas Company.

We are informed that a Company of which Senator Jones of Nevada, Wm. Hamilton of the Telegraph Stage Line, E. Burke, proprietor of the Big Blue mine, and Mr. S. Boushey of Los Angeles, are members, have purchased a large tract of the petroleum lands in the north part of the city, and that they will at once proceed to develop their property by putting down wells, and erecting a refinery. Should the company be successful, they will erect gas works, and undertake to supply the city not only with a cheap illuminating gas, but also to furnish an article of fuel that can be used for warming the dwellings, and even cooking our food. We wish these enterprising gentlemen abundant success in their undertaking, and shall be glad to chronicle their progress.

Bill to Regulate the Union Pacific—Great Increase in its Receipts.

WASHINGTON, Jan. 26.

Wilson of Indiana introduced a bill in the House to-day, making it obligatory upon the Union Pacific Railroad to receive from any of its branches freight and passengers destined for any station on that line or the Central Pacific, and carry the same to destination without unnecessary delay, charging no more per mile over the entire road than is charged over any part thereof. The Government Directors of the road, in their report to the Secretary of the Interior, say that its gross earnings may, in a short time, by good management, be increased to \$12,000,000 per year. They recommend the localization of the executive power of the road.

WASHINGTON, Jan. 26.

The House Committee on the Pacific Railroad, to-day, agreed to report favorably on the Transcontinental Railroad bill.

The Postal Savings Bank Bill.

WASHINGTON, Jan. 27.

The Committee has agreed to report adversely upon the Postal Savings Bank bill, but, in order to give the friends of the measure an opportunity to advocate it in the House, it is arranged that the bill, with the adverse report, should be put on the callander for discussion in Committee of the Whole.

WASHINGTON, Jan. 27.

The House Committee on Judiciary have under consideration Gen. Butler's resolution, instructing it to inquire and report whether the Courts of the United States have adequate jurisdiction and authority to prevent and punish improper use of the flag, and the National character of the United States, on board of merchant vessels upon the high seas or in foreign ports, and providing for seizure of vessels so offending, and for the punishment of persons who fraudulently issue marine papers.

WASHINGTON, Jan. 27.

The President has nominated Mrs. T. M. Nilson Postmaster at the Dalles.

THE HOWE MACHINE CO'S SEWING
MACHINES have become celebrated the world over. The work done on these machines is unsurpassed—sewing the thinnest material and the heaviest goods with equal facility, and requiring no extra adjustment for uneven thickness or passing over seams.
The Attachments for Sewing, Felling, Binding, Cording, Quilting, Tucking, Binding and Gathering are of the latest improved pattern, and are superior to those used on any other machine.

THE HOWE MACHINES are the STRONG-
EST and SIMPLEST and seldom or never give any trouble in operating. They are the oldest established in the world. (Mr. Howe being the original inventor, and are in evidence of all others in improvements and perfection of mechanism.)

THE SOUTHERN CALIFORNIAN,
RICHARD MELROSE, Proprietor,
Anaheim, Los Angeles Co., California.

THE CALIFORNIAN is a Weekly News-
paper, just entering the fourth year of its existence, and has the largest circulation of any Weekly published in the country. Under the management of the present proprietor its columns have been devoted to the advancement of the agricultural interests of Southern California, and it is now recognized as the representative newspaper of the Farmer.

THE CALIFORNIAN is Independent in
politics. Upon all subjects, however, in which the interests of its section are involved, its editorial columns will advocate the cause of the People against Monopolies, either Political or Commercial. Closely identified with the Grange movement in this State, it aspires to become an exponent of the principles upheld by the Patrons of Husbandry, and therefore asks of the Grangers of Southern California their assistance and support.

The aim of the CALIFORNIAN will also
be to give to its readers an epitome of the latest news items of the week, both foreign and domestic. No trouble or expense will be spared to make it, in this respect, equal to any weekly newspaper in Southern California. It will also contain a full report of the local news of the day, and a careful and thorough review of the Local and Foreign Markets.

THE HERALD
JOB
PRINTING OFFICE,
SPRING STREET,
OPPOSITE THE COURT HOUSE,
LOS ANGELES.

THE attention of the business com-
munity of Los Angeles city and county is invited to the facilities of this office for executing every description of
BOOK AND JOB PRINTING

Fully alive to the inferior manner in which a great part of the Job Printing in Southern California has hitherto been executed, the proprietors of this establishment have determined to institute a new order of things in this business.

In case of death, we send a notice to each member. We shall have agents in each town to receive the assessments and save members the trouble of sending to the Secretary. The Association, as well as its funds, is under the control of a Board of eleven Directors, who are elected annually by the members of the Association; it is also incorporated under the Civil Code, and no member can vote unless he has paid his dues. All members will be allowed the same interest on money standing to their credit that the funds of the Association draw, and they can deposit such amounts as they may desire on advance payments or as an endowment fund for future years without risk or forfeiture, whether one or more persons.

The Association is designed to save money, not to spend it. None will be allowed to belong to it, while many will bless the day that their father, mother, husband, or brother joined it.

A payment by one of the following methods is necessary in order to secure a membership:
LIFE PAYMENT.

From 18 to 25 years of age..... \$15 00
" 25 to 30 "..... 20 00
" 30 to 35 "..... 25 00
" 35 to 40 "..... 30 00
" 40 to 45 "..... 40 00
" 45 to 50 "..... 50 00

ANNUAL PAYMENTS.
From 18 to 25 years of age..... \$3 00

" 30 to 35 "..... 5 00
" 35 to 40 "..... 6 00
" 40 to 45 "..... 8 00
" 45 to 50 "..... 10 00

A Life Payment secures a life membership, and relieves a person from any further payments except the annual dues. The annual dividend of Life Members will be applied to cancel the one-dollar assessments.

Annual payments continue through life. The annual dividend to those making the annual payments will be applied first to cancel the annual payments and afterwards to cancel the one-dollar assessments.

Persons are allowed to choose between ordinary membership and Life Membership. Life Members are entitled to annual payments. Other members at the time of joining make one annual payment.

Persons taking a life membership can pay one-fourth of the required amount at the time of making application, and the balance in sixty days at one per cent. per month interest.

The interest on the Reserve Fund is distributed annually among the members as a dividend, according to the length of time each person has been a member—members of five years' standing receiving five times as much as members of one year's standing.

Do not confound us with life insurance. We are a "Protective Association." We do business in a different way from life insurance companies, but for one-fifth the expense to members, who receive all the benefit.

Further particulars of the Association can be obtained from the Secretary in person by letter, or of any Local Agent, Secretary, or L. M. HOLT, Secretary.

Objects of the Association.

The object of the Association is to secure pecuniary aid for the families of deceased dependants of deceased members. This we accomplish in the most perfect and substantial manner, as has been substantiated within the last few years by kindred societies; and that, too, with an expense so light that it has proved not to be a burden upon its members, which not only increases its popularity, but brings it within reach of those most needing its protection and aid.

Any person, male or female, may become a member of this association if he be at least 18 and over eighteen and under fifty years of age. On proof of death of a member of the Association, his family or the person he has appointed, receives immediately from the Association \$2500, or one dollar for each member in good standing, if the membership is not full.

All surplus shall be loaned on good and sufficient security (on real estate) to form a "permanent reserve fund," the interest on which annually reverts to the books of the Association, and the Secretary and Treasurer are required to give heavy bonds for the faithful performance of their duties.

The Officers and members of the Association receive no compensation whatever for their services, except the Secretary, who is simply paid for keeping the books of the Association, and the Treasurer.

All members will be allowed the same interest on money standing to their credit that the funds of the Association draw, and they can deposit such amounts as they may desire on advance payments or as an endowment fund for future years without risk or forfeiture, whether one or more persons.

The Association is designed to save money, not to spend it. None will be allowed to belong to it, while many will bless the day that their father, mother, husband, or brother joined it.
